Application/Control Number: 10/047,807

Art Unit: 1626

#### **DETAILED ACTION**

Claim 10 is pending.

Receipt of the preliminary amendment and Information Disclosure

Statement filed on 01/15/02 and 04/22/02 respectively is acknowledged and has been entered into the file.

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Application/Control Number: 10/047,807

Art Unit: 1626

consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

### Claim Rejections - 35 U.S.C. § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

all of the

2. Claim 10 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claim 10 relates to a process for preparing compounds of a formula (III) in which the substituents are as defined. The claim further requires the E/Z isomers of the compounds. E/Z isomers are geometric configuration and require a teaching that Cis/trans both actually exist. However, the E/Z isomers are not enabled or described in the specification.

1.1 T - C

Application/Control Number: 10/047,807

Art Unit: 1626

### Claim Rejections - 35 U.S.C. § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The final product of formula (III) does not have tautomers in the classical sense, for example' -OH or =O attached to a heterocyclic ring. If a tautomer exists a hydrogen atom would have to protonate a ring nitrogen creating two equilibrium states having an ionic compound and a non-ionic compound.

Additionally, the term "heterocycyl" substituted or unsubstituted is prima facie indefinite. A listing of enabled and disclosed compounds must be listed so that the metes and bounds of an eventual monopoly grant can be ascertained. Furthermore, the phrase "in the presence of a base" is indefinite, what is the role of the base? Does it form alkali metal salts?

Application/Control Number: 10/047,807 Page 5

Art Unit: 1626

Does the base hydrolyze the leaving group X? Does the base function as a solvent? Is a solvent needed by creating an alkaline pH?

There appears to be some typographical errors on page 3, lines 11-15 and 22-24, page 4, lines 3, 13-14, 18-21, 25-27 and 31, page 5, lines 3, 7-9, 14-15 and 31-32 of the specification. Correction is required.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to E. Sackey whose telephone number is (703) 305-6889. The examiner can normally be reached on Monday-Friday from 7:30 am to 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph K. McKane, can be reached on (703) 308-4537. The fax phone number for this Group is (703) 308-4556.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-1235.
